Notes:

- Historically, DIDD State Only Programs and QAURISIS do not have expenditures in accounting period 1. They do, however, have historical expenditures in periods 02 through 13.
- Family Support Services Program does not have a caseload appropriation. Services are rendered on a case-by-case and as needed basis.
- FY 2020-21 Appropriations for DIDD Supported Living Services and Targeted Case Management were adjusted to reflect only the portion appropriated for those services. State-only program appropriations were removed.
- State Only Programs are part of the Targeted Case Management appropriation and do not have a stand alone appropriation. The appropriation listed here matches the contract amount for each program.
- The Department is continuing to validate data as it is reported in the new Medicaid Management Information System (MMIS) reporting layer. This includes known issues with expenditure reported for certain service categories and caseload in certain programs and eligibility categories. The data presented in this report is preliminary based on information available as of the 15th day of the reported month, and may be restated in future reports based on further analysis.
- Starting July 2018, the Department began reporting the number of persons moved off the developmental disabilities waiting list, specifying the authorizations initiated under order of selection (waiting list) and the authorizations initiated under reserve capacity criteria per HB 18-1407 requirements. These numbers represent the total number of authorizations that occurred in a month and will not match enrollment as there is a time lag between notice of authorization and enrollment. The number of authorizations is cumulative and represents the number of unique authorizations, which includes declines. <30 values cannot be displayed due to the Health Insurance Portability and Accountability Act of 1996 (HIPAA). The Department will report year-to-date authorizations at six month increments.
